UNNATI PATHAK

Software Developer | Backend & Database Developer

+91 8982731686 | unnatipathak78@gmail.com | linkedin.com/in/unnatipathak-aug | Bhopal, MP

EXPERIENCE

Junior Web Developer 09/2024 – Present

AISECT

- Built Laravel and MySQL applications: hostel, journal and inventory management systems.
- Developed modules for student registration, room allocation, leave approval and finance tracking.
- Managed database and backend for journal, issue, stock and approval-workflow operations.
- Ensured responsive design and optimized performance across platforms.
- Enhanced CMS for Rabindranath Tagore University, CVRU Khandwa, CVRU Bihar and AISECT Hazaribagh.

Junior Software Developer Trainee 03/2023 – 09/2024

BAANS Consulting Pvt. Ltd.

- Developed frontend and backend modules in MVC .NET (C#) projects to client requirements.
- Built a construction material tracking system with PDF reports and JSON-based data exchange.
- Built employee and customer management with invoicing, trading, financial and salary reports.

PROJECTS

Journal Management System

Tech Stack: Laravel, MySQL, Role-Based Access

Database and backend for article, journal and issue management, approval workflows and content management; streamlined publishing with structured data.

- Designed MySQL database for articles, journals and issues.
- Implemented approval workflows and role-based access across user roles.

Inventory Management System

Tech Stack: Laravel, MySQL, Role-Based Access

Database and backend for inventory tracking, stock management, item requests, approval workflows and department-wise operations; automated workflows.

- Managed MySQL database for inventory tracking, stock and item requests.
- Implemented role-based access control for secure access across departments.

Hostel Management System

Tech Stack: Laravel, MySQL

Full-stack modules for student and admin management, room allocation, finance tracking and leave approvals.

- Built real-time room availability, leave management and finance entry for admins.
- Streamlined hostel operations through efficient data handling and workflow automation.

SUMMARY

Software Developer with 3+ years of experience building data-driven web applications using Laravel, MVC .NET (C#), MySQL and SQL Server. Skilled in relational database design, optimized SQL queries, role-based access, approval workflows and PDF reporting. Quick learner focused on clean, scalable code.

LANGUAGES

English, Hindi

SKILLS

Backend

C#, MVC .NET, Laravel (PHP), Role-Based Access Control, Approval Workflows, JSON Data Handling, PDF Report Generation, MVC Design Pattern

Database

SQL Server, MySQL, Oracle, Database Design, Relational Databases, Optimized SQL Queries

Frontend

React, JavaScript, HTML, CSS, Responsive Design

Other

Content Management Systems (CMS), Web Application Development, Performance Optimization

PROJECTS

Scaffold Material Tracking System

Tech Stack: MVC .NET, C#, SQL Server, JSON

Web app to track construction materials, maintain usage logs in tables and generate PDF reports.

- Implemented JSON-based data handling between frontend and backend.
- Generated PDF reports of material records for documentation.

Wolfe Employee & Customer Management System

Tech Stack: MVC .NET, C#, SQL Server

Full-stack customer invoicing, trading reports, and employee salary and holiday reports.

- Handled both frontend and backend development using MVC design patterns.
- Built custom financial reports for customers.

EDUCATION

MBA in Information Technology 2021 – 2023
IIBM Institute of Business Management, Noida

Bachelor of Commerce (Computer Application) 2017 – 2020
SECT College of Professional Education, Bhopal

Intermediate (12th, Biology) 2016 – 2017
Madhya Pradesh Board, Bhopal

CERTIFICATIONS

Diploma in Cloud Computing (2020 – 2022)

Women Excellence Award, AISECT
